

Internal Control Supported by JP1

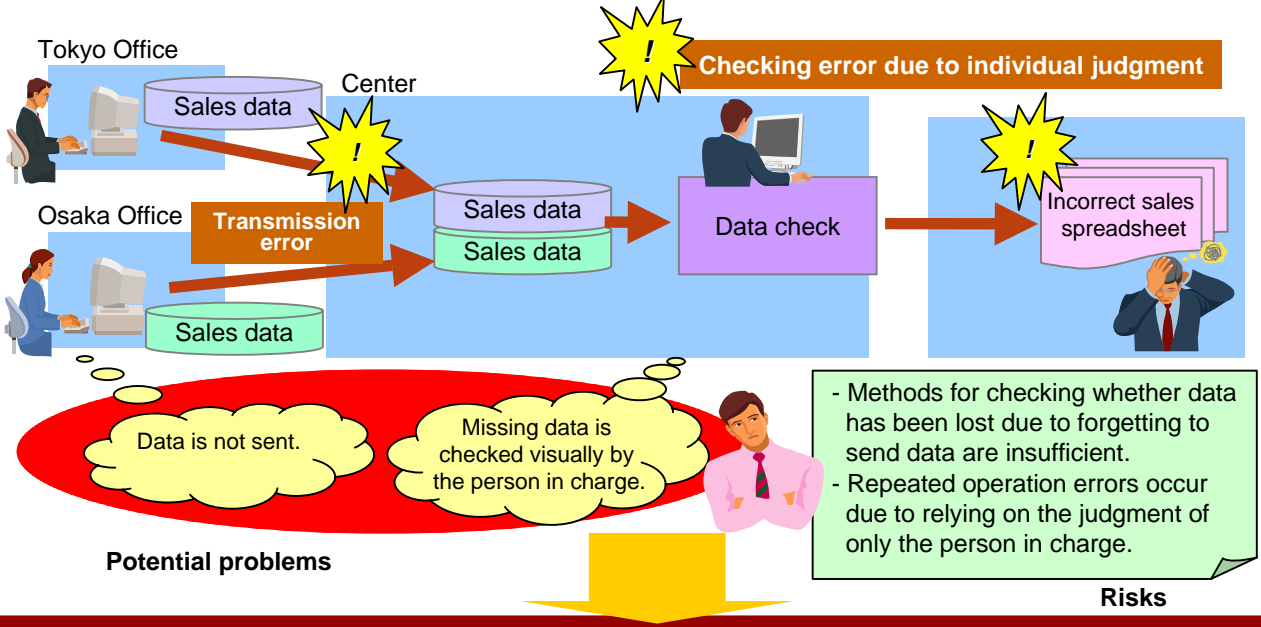

Using Automation to Avoid Risks Related to Manpower

HITACHI
Inspire the Next

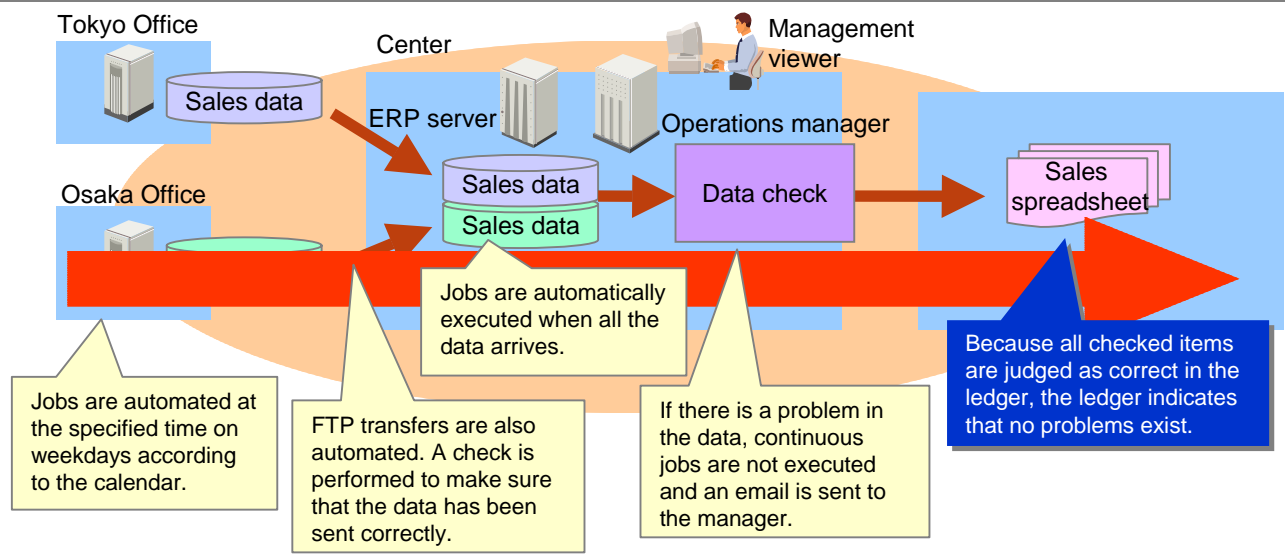

For internal control, daily operations are automated so that the systems operate correctly and risks related to manpower are reduced.

Potential Problems and Risks Associated with Operations

Use automation to reduce risks related to manpower.

- For example, you can avoid the following risks:
- Because automated operation is performed according to a schedule, no operational delays occur.
 - You can check whether data has been lost due to file sending errors.
 - Calculations are performed after all data is collected.
 - Checks are also automated, and continuous processes are interrupted if a hit occurs.

System Configuration Example

You can automate your operations to reduce risks.

Issue

- Prevention of the errors caused by using manpower to perform batch processing

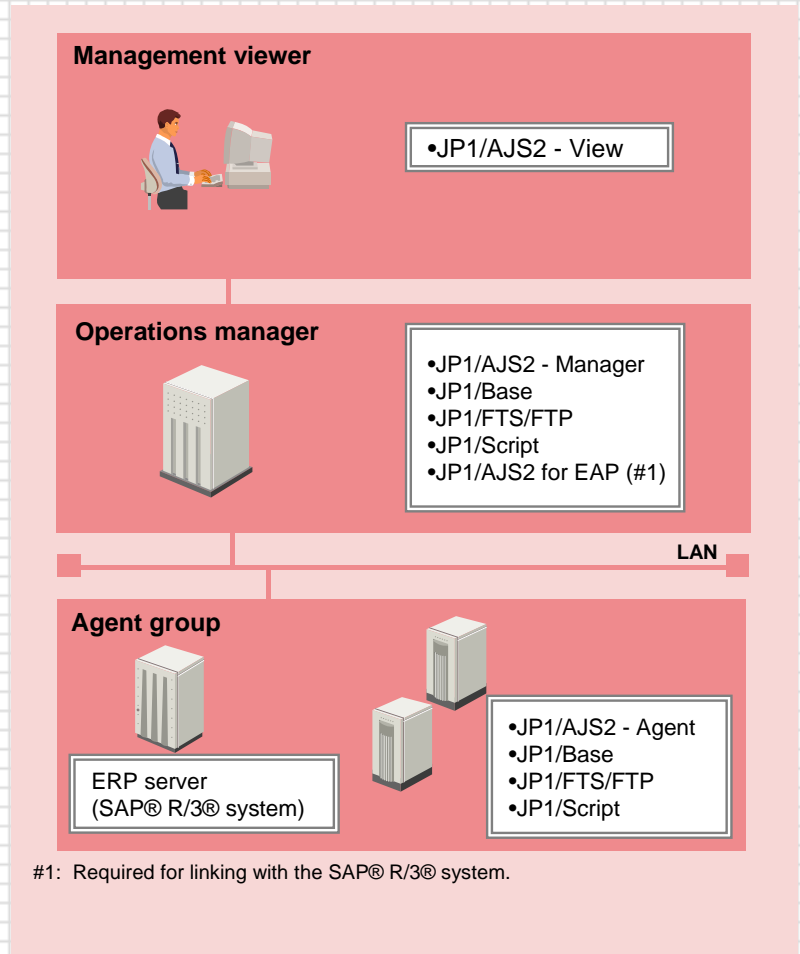

Solution functions

- Automation of batch processing
- Automation by using a schedule
- Automation by triggering events

Result of introducing JP1

- Improvement of the reliability of batch processing by reducing operation errors

Configuration

Product Nickname	Official Name
