

Olympus (Shenzhen) automates SAP R/3 job operations on HA mode with JP1.

Mr K Hoshi
General Manager
Corporate System Department
Olympus (Shenzhen) Industrial Ltd

OLYMPUS

“It’s the service that sets Hitachi JP1 apart from competitors. The Hitachi JP1 team and CL Systems (China) deliver exactly what we need to manage our mission-centric SAP application and schedule numerous jobs in a multi-platform environment.

One of the most impressive features is its easy-to-use, drag-and-drop jobnet creation flow that helps our administrators view and manage hundreds of job flows on a single screen.

With our implementation of JP1, we’re guaranteed solid return on investment into our current systems configuration.”

When Olympus (Shenzhen) Industrial Ltd was looking for a solution to integrate critical SAP R/3 jobs across HP-UX and NT servers, JP1 was selected to meet the company’s critical requirements.

Running HA mode on both SAP servers, JP1/AJS performs job automation and recovery, resulting in the highest level of service availability. What’s more, the interactive and user-friendly GUI lets Olympus create job sequences easily. The comprehensive scheduling functions provide flexibility for changes, much needed in today’s business environment. JP1 solutions enable the Olympus IT team to enhance operations and prepare for dynamic needs in the future.
