Update: October 29, 2004

### Vulnerabilities Related to the zlib Compression Library

On March 12, 2002, the CERT/CC disclosed Advisory [CA-2002-07](#) indicating a security problem in the zlib compression library.

The problem is a vulnerability found in the zlib compression library (zlib 1.1.3 or earlier) during deallocation of memory. This vulnerability also affects programs linked to the zlib library. *By exploiting this vulnerability, an attacker may be able to conduct a denial-of-service (DoS) attack, leak information, or execute arbitrary code.*

This security problem affects the following products provided by Hitachi Software Division. We will provide patches or other corrective measures for these products, one by one.

(Although Hitachi has not confirmed the zlib security problem occurring in these products, we will provide patches according to the security policy of [zlib.org](#).)

**HS02-005;  
Vulnerabilities Related to the zlib Compression Library**

### Modification in JP1/NETM/DM Related Products and JP1/Remote Control Related Products

A security problem was found in the zlib compression library of products related to Job Management Partner 1. Please use the following patches to replace your module files.

[Notes]

- For JP1/NETM/DM Set (model: P-2642-1064), apply the patches for JP1/NETM/DM Manager (model: P-2642-1164), JP1/NETM/DM SubManager (model: P-2642-1264), and JP1/NETM/DM Client (model: P-2642-1364).
- For JP1/Remote Control Set (model: P-2642-1864), apply the patches for JP1/Remote Control Manager (model: P-2642-1664), and JP1/Remote Control Agent (model: P-2642-1764)
- JP1/NETM/DM Client (model: P-2642-1314) for Windows 3.1 does not have any problem.

### HS02-005; Vulnerabilities Related to the zlib Compression Library

## Modification in XMAP3

A security problem was found in the zlib compression library of XMAP3 products. Please use the following patches to replace your module files.

[Notes]

- Note the following when applying the patch for P-262B-5F44 XMAP3/Web.
  - (1) Once you apply the patch, the original status before the patch cannot be resumed. Apply the patch after due consideration.
  - (2) To apply the patch, you must update the contents of the HTML for activating application programs on the Web server.
- When you apply the patch to XMAP3 used in a C/S system configuration, be sure to apply the patch to both XMAP3 products on the server and the client.

P-2418-3154	System Manager - Management Console Version 5.0	05-00, 05-10, 05-20, 05-21, 05-30		05-50-/A (*2)	August 6, 2004
P-2418-315U	System Manager - Management Console Version 5.0 Upgrade			June 14, 2004	August 6, 2004

(\*1) Please upgrade the version to 03-60-/C of model P-2418-3134, P-2418-313U or 05-50-/A of model P-2418-315U.

(\*2) Please upgrade the version to a fixed revision.

### [Workaround]

Please uninstall the JRE installed from the CD-ROM of System Manager-Management Console. In this case, please use the console service, because the Web console function of System Manager will not be available. The console service includes the Web console function.

If any products except the System Manager use the JRE, uninstalling the JRE may affect the products. Please be careful when uninstalling the JRE.
