Update: April 26, 2006

## Groupmax Mail Client Processing Is Stopped by an Email Attachment File

- Affected products

Corrective action	Product name	Platform	Last update
<a href="#">HS06-006-01</a>	Groupmax Integrated Desktop, Mail Client, GroupMail/Client(DOS/V), GroupMail/Client, Groupmax World Wide Web Desktop	Windows	April 26, 2006

- Problem description

On January 31, 2006, JP Vendor Status Notes (JVN) announced that multiple mail client software was vulnerable to having its mail client processing stopped by an email attachment file ([JVN#89344424](#)).

The above Groupmax mail client processing might stop or work incorrectly when email opened by the client has an attachment file that includes a device file name.

### Revision history

- April 26, 2006: This page is released.

- Hitachi, Ltd. (hereinafter referred to as "Hitachi") tries to provide accurate information about security countermeasures. However, since information about security problems constantly changes, the contents of these Web pages are subject to change without prior notice. When referencing information, please confirm that you are referencing the latest information.
- The Web pages include information about products that are developed by non-Hitachi software developers. Vulnerability information about those products is based on the information provided or disclosed by those developers. Although Hitachi is careful about the accuracy and completeness of this information, the contents of the Web pages may change depending on the changes made by the developers.
- The Web pages are intended to provide vulnerability information only, and Hitachi shall not have any legal responsibility for the information contained in them. Hitachi shall not be liable for any consequences arising out of or in

connection with the security countermeasures or other actions that you will take or have taken (or not taken) by yourself.

- The links to other web sites are valid at the time of the release of the page. Although Hitachi makes an effort to maintain the links, Hitachi cannot guarantee their permanent availability.

Update: April 26, 2006

**HS06-006;**

**Groupmax Mail Client Processing Is Stopped by an Email Attachment File**

### Solutions for Groupmax Mail - SMTP

The processing of Groupmax Integrated Desktop, Mail Client, GroupMail/Client(DOS/V), GroupMail/Client, and Groupmax World Wide Web Desktop (Gmax Mail client) might stop or work incorrectly when email opened by the Gmax Mail client has an attachment file that includes a device file name. As a countermeasure against this vulnerability, apply the fixed version of Groupmax Mail-SMTP, which is the server product for Gmax Mail clients. Fixed versions for the recent versions are available indicated below. Upgrade the Groupmax version in your system to the appropriate version.

#### [Affected models and versions]

Product name	Model	Version	Platform	Last update
Groupmax Integrated Desktop Version 7	GMX7-IDS9 (*1)	07-00 to 07-20-/C	Windows	April 26, 2006
Groupmax Integrated Desktop Version 6	GMX6-IDS9 (*1)	06-00 to 06-52-/C		April 26, 2006
Groupmax Integrated Desktop Version 5	GMX5-IDS9 (*1)	05-00 to 05-11-/H		April 26, 2006
Groupmax Integrated Desktop Version 3	GMX3-IDS9 (*1)	03-00 to 03-10-/P		April 26, 2006
Groupmax Integrated Desktop Version 2.0	GMAX-IDS9 (*1)	02-10 to 02-31-/S		April 26, 2006
Mail Client	GMAX-MCL3 (*1)	02-00 to 02-31-/E		April 26, 2006
GroupMail/Client(DOS/V)	P-2246-1114	01-21-/C to 01-21-/D		April 26, 2006
GroupMail/Client	P-9746-1111	01-01 to 01-21-/G		April 26, 2006
Groupmax World Wide Web Desktop Version 6	GMX6-WWWW (*1)	06-00 to 06-52-/F		April 26, 2006
Groupmax World Wide Web Desktop Version 5	GMX5-WWWW (*1)	05-00 to 05-11-/J		April 26, 2006
Groupmax World Wide Web Desktop	GMX3-	03-00 to		April 26,
