Update: October 29, 2004

### Issue in Log-In Authentication of JP1/File Transmission Server/FTP

- Affected product

Corrective actions	Product name	Platform	Last update
<a href="#">HS04-004-01</a>	JP1/File Transmission Server/FTP	HP-UX	August 31, 2004

- Problem description

A problem in log-in authentication may occur, when the above product is used.

In a specific case, any user can bypass the JP1/File Transmission Server/FTP authentication mechanism. Malicious users can gain the administrator rights to access server files. This issue is specific to JP1 and occurs only on HP-UX running in trusted mode.

#### Revision history

- October 29, 2004: Problem description is added.
- August 23, 2004: This page is released.

- Hitachi, Ltd. (hereinafter referred to as "Hitachi") tries to provide accurate information about security countermeasures. However, since information about security problems constantly changes, the contents of these Web pages are subject to change without prior notice. When referencing information, please confirm that you are referencing the latest information.
- The Web pages include information about products that are developed by non-Hitachi software developers. Vulnerability information about those products is based on the information provided or disclosed by those developers. Although Hitachi is careful about the accuracy and completeness of this information, the contents of the Web pages may change depending on the changes made by the developers.
